

# Propulsion Analytics

## QUALITY MANAGEMENT POLICY

**Propulsion Analytics** is engaged in the development of innovative data analytics and software solutions for the maritime industry, aiming to optimize vessel performance and efficiency.

Our goal is to provide our customers with high-quality products and services that fully meet their needs and expectations, while also contributing to the reduction of the environmental footprint of the shipping industry.

To achieve our objectives:

- We are committed to implementing and continuously improving the Quality Management System in accordance with **ISO 9001:2015**.
- We invest in **research and innovation**, integrating new technologies and practices that add value to our customers.
- We ensure **customer satisfaction** by providing reliable, timely, and effective solutions.
- We support the **continuous training and development of our staff**, recognizing that our people are our most valuable asset.
- We consistently comply with **legal and regulatory requirements**, as well as our commitments to stakeholders.
- We promote a culture of **collaboration, transparency, and accountability** across all our activities.

The Management of Propulsion Analytics is committed to the implementation of this Quality Policy and to the continuous review of the company's objectives and strategy, in order to respond to industry developments and customer needs.

This Policy is communicated to all company personnel, is available to our customers and partners, and serves as the reference point for all improvement initiatives.

For Propulsion Analytics
